Government Engineering College,
Banswara - 327001 (Rajasthan)

Needs for conference

Employability is "the capability of getting and keeping satisfactory work".

Employers often wish to see that you can communicate in a certain field and look to nurture your skills and potential in the long term. "We have seen organizations intentionally employing functionally fluent graduates," says Humair Naqvi, enterprise and education regional director of Rosetta Stone. Communication skill tops the list of fundamental skills needed to succeed in the workplace. A decade-and-a-half later, with the rise of social media networking and texting, communication is becoming more casual, even in situations where more formal ways of communicating are required. What this means is that people from the younger generation, may not know or even understand the importance of effective communication skills in the workplace. When you take a look at the greatest leaders, one of the traits they possess is the ability to communicate effectively which underscores the importance of communication skills. Communication skills are key to success in any sector but are particularly important in highly technical sectors such as IT where the language used can become full of jargons. Employers pick out individuals who can demonstrate excellent verbal and written communication skill, teamwork and interpersonal skills, initiative, and a strong work ethic.

Foreign language for specific purposes can prepare the learners to qualify themselves at the campus interviews, improve their job opportunities, and make them more employable at global level.

Aim and Objectives

- 1) To enable the learners to Listen, Speak, Read and Write with increased confidence and competence.
- 2) To enhance opportunities for career promotion.
- 3) To develop personal presence and greater self-trust.
- 4) To learn in a supportive environment.
- 5) To develop the student 's ability to construct and present logical argument discursively.
- 6) To foster language development from sentence level skills to large document writing and oral communication.
- 7) To encourage active participation through class discussion and response to formative feedback.
- 8) To nurture the ability to communicate problem identification, formulation and solution to diverse audiences and use development in communicative ability as a vehicle for fostering students' insight and perspective on engineering practice in the community, including the social, cultural, political, international and environmental contexts of professional engineering practices.
- 9) To learn communication skills which promote Human Resource Training.
- 10) To master communication education which enhances the effectiveness of business executives.
- 11) To nurture communication skills which are top priorities for entrepreneurs and corporate.
- 12) To explore strategies for curriculum revision to impart better communication skills for business.

About the Conference

The focus of this conference will be to ensure that learners understand both the personal attributes valued by employers and the principles of communicating effectively whilst developing effective communication skills and addressing their own personal development needs. It is important that learners are able to communicate with technical and non-technical staff and understand different types and vehicles of communication which are appropriate.

With an aim of acquisition and learning communication skill a one-day conference with the theme "Acquisition of Vocational Communication Competence" is planned on Feb 23rd, 2018.

Themes

- * Communication skills development
- * Ability to speak in public life.
- * Communication education for cross-cultural understanding.
- * Communication education for career success and the business enterprise.
- * Communication education for a desirable job.
- * Oral communication and listening abilities for employment.
- * Essential pleasing communicative behavior in Specific Professional careers [accounting, auditing, banking, engineering, industrial hygiene, information science, public relations, sales, etc.]
- * Communication Education for upward mobility in one's career.
- * Communication education for making Business/Customer interactions more satisfying and productive.
- * Skilled teachers for communication education.
- * Importance of communication.
- * Basic communication skills for various vocations.
- * Strategies for communication education programs to survive in tough times.

About the Institution

Govt. Engineering College, Banswara was established in 2012 under SFS mode as a part of Ajmer Engineering college society. Its infrastructure is developed by the Tribal Area Development Department(TADD). It is funded by the Government of Rajasthan. It has three B.Tech programs (CE, ME, EE) and each has sixty seats. The high quality of teaching and relentless efforts of students is the mark of GEC, Banswara. It is situated behind Mayur Mill at Lodha village in Banswara. Banswara is a small city in Banswara district of south Rajasthan in India. It is called Cherapunjee of Rajasthan and lush green landscape is the chief attraction for the visitors.

The state of Banswara was founded by Maharawal Jgmal Singh. It is known for the "Bans" or bamboo forests in the area. It is also known as the "City of Hundred Islands", due to presence of numerous islands on the Mahi river . The famous temple of Tripura Sundari and Jain Tempala Andeshwar are place of religious faith and reverence.

Call for Papers

Papers on the given themes are invited from researchers/scholars/academicians/teachers/business and industry employees. One copy of full length paper not exceeding ten A4 size pages should be submitted to the Conference Coordinator (ncavcc2018@gmail.com). The selected full length papers would be compiled and published in the conference proceeding.

Eligibility

Professionals, academicians and researchers from industries, Colleges / Universities, R&D laboratories are invited to attend the conference.

Registration Fee

Registration of delegates is to be made in advance by remitting the registration fees as indicated below with duly filled registration form.

Particulars	Indian Rupees
Corporate Members/HR	2000
Academicians	1000
Research Scholars / Students	800
Accompanying persons	800

Registration fee (Non Refundable fee) in the form of DD should be drawn in favor of "Principal, Government Engineering College, Banswara", payable at Banswara. DD must be sent along with application to the coordinator of the conference. The conference papers will be published in ISBN conference proceeding.
